Love You Like The Falling Rain

©1997 by Walkin' Jim Stoltz, Walkin' Jim Music, BMI

```
        G                                   C  Am
1)      It seems like a month that I've been gone
          C          D                  G
        Walkin' my own lone, wayward way,
          G                                          C        Am
        And though each mile brings me closer back to you, my love,
             C            D                   G
        Sometimes these feet  seem made of clay.

                    C                   D
Chorus:     'Cause I love you like these mountains,
                      G                  Em
            Always standing in my dreams
                   C         D            G
            Each sunrise is calling out your name,
                   C                D                  G              Em
            And I love you like the river sweepin' toward the open plain
              C                D      G Em   C                  D      G
            I love you like the fallin' rain,    Love you like the fallin' rain.

2)      Though the trail be overgrown, and rough and rocky,
        And I'm pelted by the snow and freezin' rain,
        There ain't nothing that's going to stop me,
        From makin' my way home to you again.
                (Repeat Chorus)

              C                  D            G
Bridge:     Our love was born on the mountain
            C              Am         D
            Tested in the dry desert wind,
             C                   D              G          Em
            Tempered by that cold Montana winters
            C                  Am             D      Em
            Sealed with the spring come 'round again.
                (Repeat Chorus)
